4. This report contains indications relating to the following items:

- ☒ Box No. I Basis of the report
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/000705

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-32	YES
	Claims	NONE	NO
Inventive step (IS)	Claims	1-32	YES
	Claims	NONE	NO
Industrial applicability (IA)	Claims	1-32	YES
	Claims	NONE	NO

2. Citations and explanations (Rule 70.7)

1. The claimed invention relates to a method of obtaining traffic information using the billing information of a mobile terminal that can obtain a specified number of a mobile terminal from the billing information and track the moving time of a corresponding mobile terminal between the base stations when the mobile terminal attempts a telephone call on a highway, so that information on the road traffic can be obtained in real time.

D1 (JP 1998-307993) discloses a traffic information collection system which can collect the information received by every repeater via a fixed station and acquiring various traffic information on the road where a mobile station is moving based on those collected information.

D2 (KP 2000-0058946) discloses a method of measuring speeds of moving objects through the position tracking operation of a mobile terminal, which comprises the steps of making base stations connected with terminals within a corresponding area to perceive positions of the terminal.

D3 (KP 1999-0050214) discloses a traffic information service method using a prior radio communication network, which provides traffic information to a user at real time and also reduces cost required in constructing an infra to get traffic information.

The claimed inventions meet the criteria set out in PCT Article 33(2)-(3) because the cited documents D1-D3 do not teach nor fairly suggest a method of obtaining traffic information using the billing information of a mobile terminal.

2. Claims 1-32 have industrial applicability under PCT Article 33(4), because the subject matter claimed can be made or used in industry.
